EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carol Nottenburg on October 21, 2005.

The application has been amended as follows:

In claim 17, "claim 7" has been deleted, and —claim 8—has been substituted therefor.

In claim 29, at line 6, (a) has been deleted, and —(i)—has been substituted therefor.

In claim 29, at line 9, (b) has been deleted, and —(ii)—has been substituted therefor.

In addition, the following listing of claim 28 will replace the prior version:

28. (Currently amended): A method of releasing a compound from a glucuronide exposed to a host cell, comprising:

- (a) introducing into the host cell a vector construct, the vector construct comprising a nucleic acid molecule encoding a β -glucuronidase; wherein the β -glucuronidase comprises SEQ ID NO: 4 or residues 19-634 of SEQ ID NO:4, and
- (b) exposing the host cell to the glucuronide, wherein the glucuronide is cleaved by the β -glucuronidase, such that the compound is released.

Art Unit: 1638

2. The following is an examiner's statement of reasons for allowance: the claimed invention is free of the prior art given that an isolated nucleic acid comprising nucleotides 1-1905 of SEQ ID NO: 3 or nucleotides 54-1905 of SEQ ID NO: 3 or an isolated nucleic acid encoding SEQ ID NO: 4 or residues 19-634 of SEQ ID NO: 4 were not taught or suggested in the prior art of record. In addition, note that the amendment of the claims filed August 29, 2005 in which the specific nucleotides defining the fragments has been changed is not considered new matter given that the original claims referred to the nucleotides present in the Figures, as originally filed. This amendment corrects the claims so that the originally identified fragments are properly identified in the sequence identifiers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth F. McElwain whose telephone number is (571) 272-0802. The examiner can normally be reached on increased flex time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones can be reached on (571) 272-0745. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
